# **WEATHER KEY POINTS**

**09/13/21 - 09/19/21**

## **Monday-Sunday**

- Dry conditions and breezy winds could lead to elevated to locally critical fire weather concerns this week, including in the northern mountains and across the southern California mountains, deserts, and interior valleys
  - Critical fire weather conditions are expected across far northern California on Monday afternoon and evening
- Hot temperatures will persist over much of interior southern California through at Monday, with moderate to locally high heat impacts expected
  - Locally moderate heat risk concerns will linger into Tuesday and Wednesday, including across portions of Inland Region
  - A cooling trend is expected for mid-to-late week
- Dry weather is expected for the state through much of the week
  - Primarily beneficial precipitation could return to portions of northern California for the weekend
- Areas of thick wildfire smoke will persist across far northern California through at least early this week
